Projects

Elevate.AI — AI – Powered Business Assistant | [GitHub](#)

Technologies: React.js, Node.js, Express.js, Supabase, Gemini API (LLM)

- Collaborated in a team to develop a full-stack AI-Powered SaaS platform for student led startup support and small business.
- Built responsive frontend UI using React.js with component-based architecture, ensuring consistent experience across mobile and desktop.
- Integrated Gemini API for features like blog generation, SEO optimization, sentiment analysis, and data analysis.

Password Generator — React Web Application | [GitHub](#) | [Live Demo](#)

Technologies: React.js, Javascript, CSS

- Created a password generator with React functional components and Hooks (useState, useEffect, useCallback).
- Implemented real-time password generation with customizable length, numbers, symbols, and one-click clipboard copy functionality.

Portfolio – Personal Website | [GitHub](#) | [Live Demo](#)

- Created and built a personal web page that was responsive to display projects, skills, and achievements.
- Designed a clean, modern interface using HTML and CSS.
- Optimized layout for mobile and desktop devices.

Publications

Elevate.ai: An AI-Powered SaaS Platform for Student-Led Startup Support and Small Business

Published in AIJFR, Vol. 7, Issue 2 (Mar–Apr 2026)
